

The WINSPlatform Solution

Water Integrated Network Solution Platform is the first Malaysian controller that includes Web Server, PLC, RTU, SCADA and Mobile Accessibility functions in one single unit.

GT500X SERIES REMOTE TERMINAL UNIT

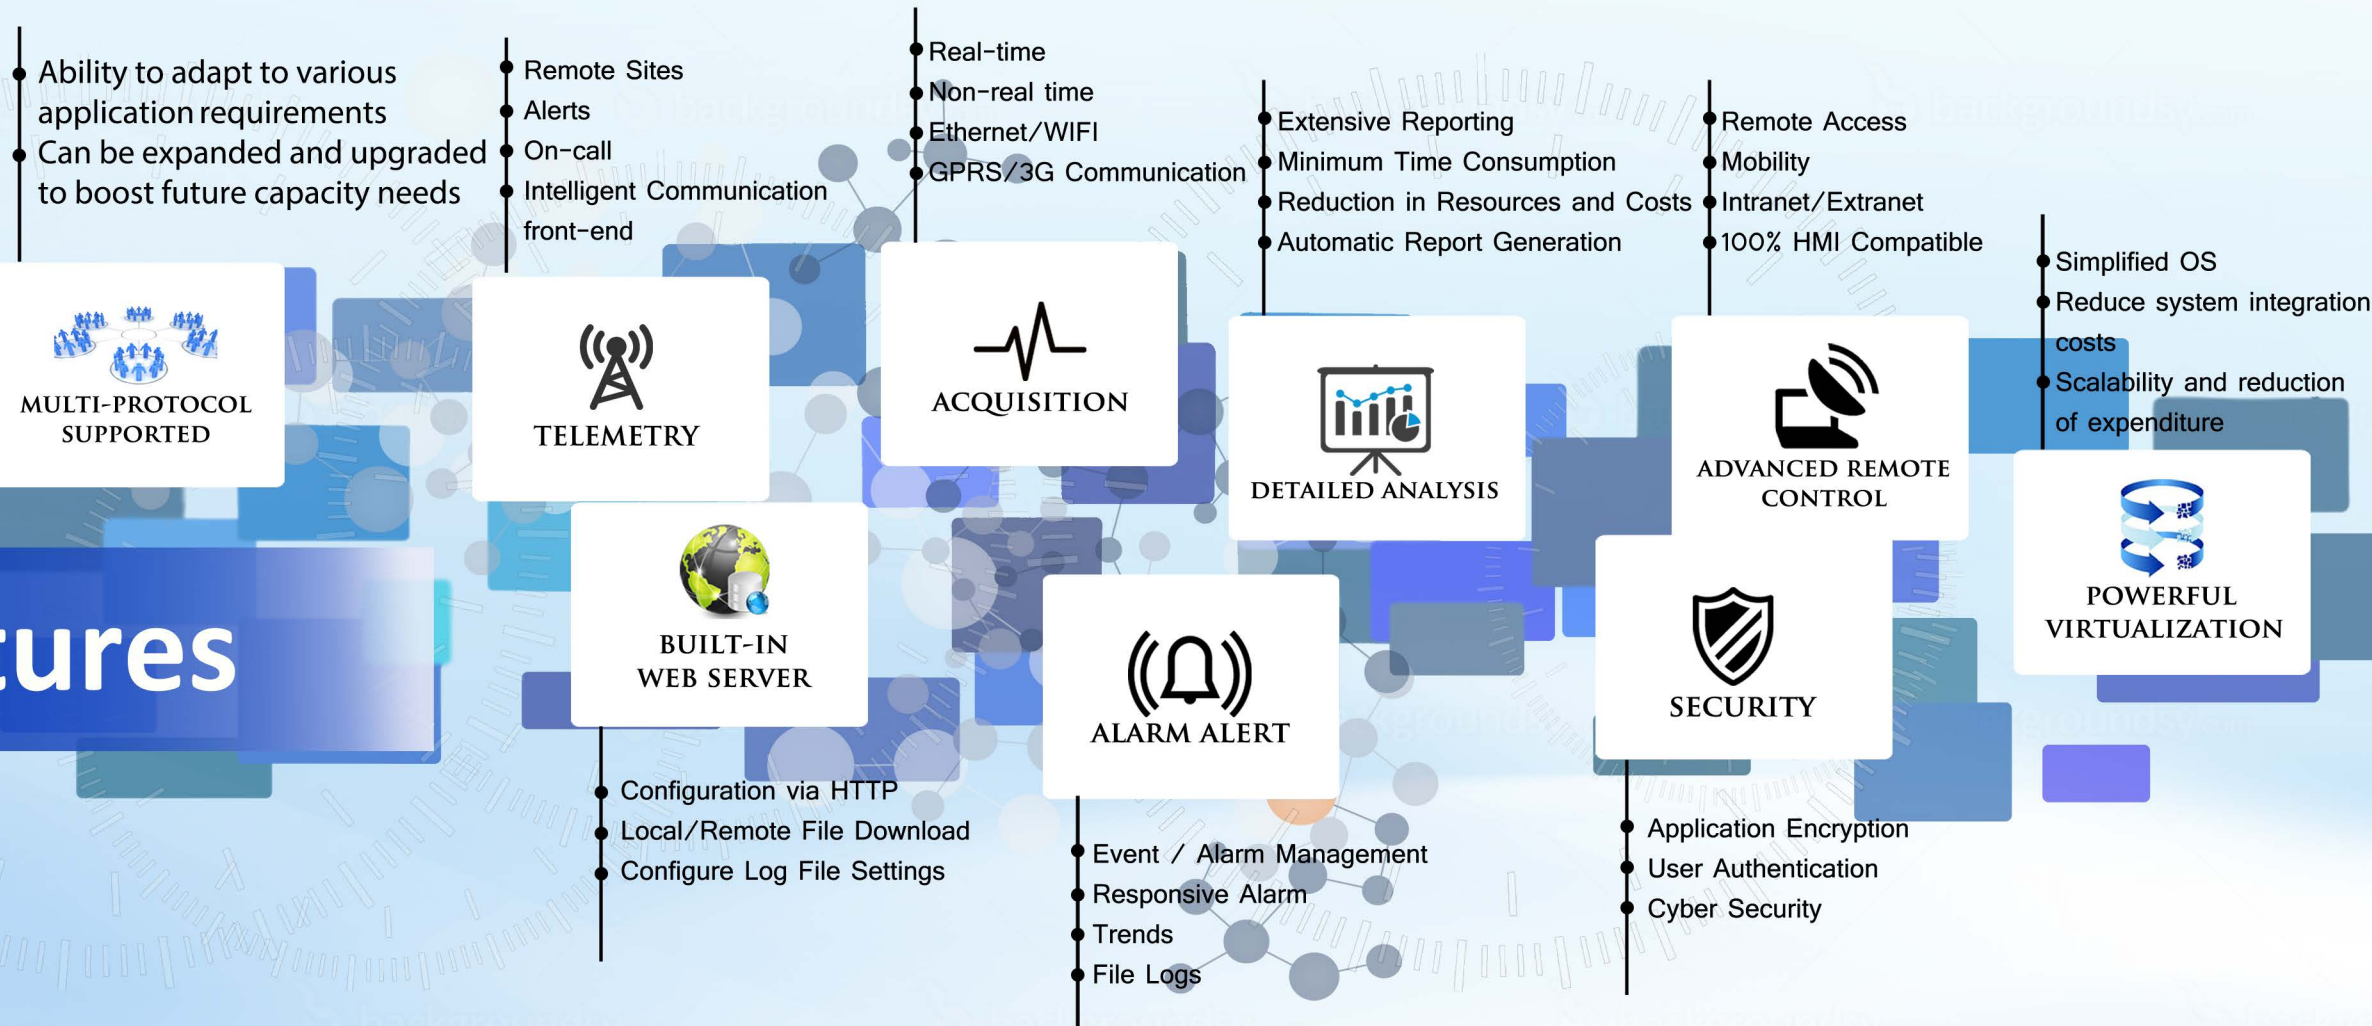

WATER INTEGRATED NETWORK SCADA PLATFORM

WINSPlatform GT500X Series RTU capable of directly interfacing with the majority of measuring equipment and devices present on site (flow meters, level sensor, water quality sensors, system analyzers, power meter, actuator, motor, pumps and etc). Implementing deep learning algorithm, GT500X is the one-stop solution to satisfy any application, with remote control access, and data-driven learning capabilities.

Key Features :

- Data acquisition
- Event processing
- Alarms
- Data calculations
- Message transmission (SMS, Internet, etc.)
- Data archiving
- Source timestamping
- User profile management
- Virtualization
- Data diagnostics assistance
- Remote Control
- Built-in Web Server for configuration via WiFi
- Reliable security
- Works with unlimited workstation applications

GT500X Features

Its IT Standards and Open Structure Support makes GT500X stay ahead from others.

With GT500X, it is the only platform with off-the-shelf features or those developed with specific application requirements, while you automatically benefit from the services provided by the infrastructure such as configuration, dynamic persistence and redundancy. The standardization and open design offer endless capability and extension possibilities with GT500X.

- > Field-tested quality and proven with more than 1000 sites as references
- > Compatible with all fields of activity
- > Open Architecture Based - Open to all types of hardware, protocols, customized development and applications
- > Latest technology
- > Top quality and responsive support
- > Designed to work in most economic and power saving way

Specifications

General

Dimensions	200 (W) x 120 (H) x 100 (D) mm
Weight	Approx. 2kg
Enclosure material	IP-65 Aluminium Alloy Enclosure
Operating Temperature	-30 to +85 degree Celsius
Humidity Test	95% (RH) Relative Humidity
LCD Display	7" Color LCD Capacitive Multi-touch Screen @ 1280 x 720 resolution & 4K Micro HDMI port
CPU Processor	Quad Core 64-bit Cortex A-55 @ 2.0GHz

Power Supply

Operating Voltage	9-36Vdc
Power Consumption	10mA in Standby Mode; 100mA during Data Transfer
Compatibility	Solar Power System and AC Power System

Digital Inputs

Number of Inputs	24 bi-directional channel
Type	24 logic level
Address Assignment	User configurable

Digital Output

Number of Output	20 with open drain FET and logic output
Additional Output	4 Relay (Free Contact) Output

Analog Inputs

Number of Inputs	4 Input Channels with opto coupler
Calibration	2-points, full user control
Supported Type	1 isolated 3-wired / 4-wired input; 2 isolated 2-wired inputs; 3 common reference 2-wired inputs
Address Assignment	User configurable

Analog Outputs

Number of Output	4 Analog output channels
Others	Voltage Output 0-10Vdc or Current Output 4-20mA

Other Ports

RS232 Port
RS485 Port
USB
Network Services
SDI-12
Others

Built-in 1 x RS232 Serial Port Connector
Built-in 1 x RS485 Serial Port Connector
4 x USB type A & 1 x USB type C
2 x RJ45 10/100 Ethernet Port
2 SDI-12 Channel with shared digital channel
Baud rate : 300 to 115,200

Storage

Internal Capacity

64GB eMMC flash memory with capability to store at least 3 years of data;for minimum 8 parameters
Compatible with SD card for storage expansion
Approx 90,000 data points per megabyte
4GB LPDDR4

Compatibility

Function

Data Collection Application

Rainfall, Water Level, River Flow, Evaporation, Siren, Air Quality, Water Quality, Soil Moisture
FTP, http, DNP3, MODBUS TCP, DB Sync
TIEDA, AQUARIUS, CSV, JSON, XML
Able to Sync Data up to 8 Servers
SMS Data/Event/Alarm up to 10 Users
Built-In 4G GSM Modem(optional);
Compatible with NB-IOT Modem,via USB Port
Supports data sending via Satellite communication

Communication Protocol
Data Format
Server
SMS
Communication Modem

Others

System

Data Logging
Data Retrieval
Display Functions
Firmware Upgrade via
NTP Protocol
Others

Default 5 minutes time stamp
Via Internet Browser in Fixed IP or Wireless LAN
Channel data, alarms, system status
Wireless LAN and USB
RTC auto sync with NTP
Built-in Wireless 2.4GHz and 5GHz IEEE 802.11b/g/n/ac, and Bluetooth 5.0

Certifications

IEC 61000-6-2
IEC 61000-6-4

FEDERATION OF
MALAYSIAN
MANUFACTURERS
